

SUPERCHARGED

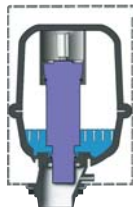

0-70 GPM IN 0.1 SECONDS!

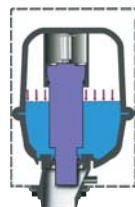

Maximum performance under pressure.

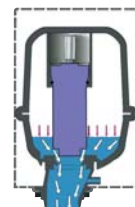

How
FLUSHMATE®
Works

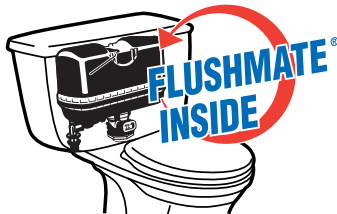

1. Water enters the tank, the air inside is trapped and compressed.

2. The charged toilet is ready to flush.

3. When flushed, the **SUPERCHARGED** pressure pushes water through the toilet at more than three times the rate of a traditional gravity system.

*Demand the Original.
Demand FLUSHMATE.®*

FLUSHMATE® has taken what hot-rodders have known for decades: “Supercharging” blows the competition away. **Available in both 1.0 and 1.6 gallon-per-flush systems**, supercharged FLUSHMATE-equipped toilets install in the same manner as other toilets and stay cleaner due to a large water surface and vigorous flushing action.

With water savings and no double-flushing, FLUSHMATE offers you the competitive edge because there is no better flushing technology available today. Plus, FLUSHMATE-equipped toilets don't sweat.

Look for a toilet with proven technology. Look for FLUSHMATE inside. Call **800-875-9116** or visit www.flushmate.com to find a local distributor near you that offers FLUSHMATE-equipped toilets.

FLUSHMATE products cannot be retrofitted to existing toilet bowls.
