

TODAY'S LOW CONSUMPTION TOILETS HAVE A LOT OF USES

After it clogged and ruined his bathroom, this homeowner turned his toilet into a striking backyard planter. What the homeowner didn't know at the time was that low-consumption toilets CAN work – when they have *FLUSHMATE*® inside.

FLUSHMATE is an innovative pressure-assist technology developed by Sloan Valve Company that consumers really appreciate. For example, they love how *FLUSHMATE*-equipped toilets provide the strongest flushing action, assuring one-flush performance. They also know *FLUSHMATE* saves more water than other 1.6 (6.0 Lpf) low-consumption toilets by eliminating second flushes. Plus, consumers recognize that *FLUSHMATE* toilets have the largest water spot, assuring a consistently cleaner bowl. In fact, *FLUSHMATE* technology has been rated #1 by independent testing labs and consumer surveys for the last four years.

Today you have a choice: you can buy a regular low-consumption toilet, or you can buy a toilet with *FLUSHMATE* inside – available in water-saving 1.6 gpf (6.0 Lpf), 1.28 gpf (4.8 Lpf) and 1.0 gpf (3.8 Lpf). Find out why leading fixture manufacturers have designed toilets to accommodate *FLUSHMATE* inside, and why it's becoming America's choice for toilets that work.

Call or write for our free information kit on why the *FLUSHMATE* Pressure-Assist System is better – BEFORE you buy your next toilet.
