

New Flushmate® III - 503 and 503H Series

Designed for stronger performance.

Meet the latest Flushmate® III – 503 and 503H series pressure-assisted systems with a redesigned body that is stronger and more resilient for years of service and water savings. Best of all, these industry leading pressurized vessels allow for a more powerful and dependable flush to keep your toilets clean. And they are interchangeable with previous Flushmate III - 503 and 503H Series versions for a no risk, no hassle upgrade.

Features and benefits

- The improved vessel design makes the vessels stronger and more reliable than previous flushmate versions
- Improved drainline carry versus previous versions
- Interchangeable with existing Flushmate pressurized systems
- Gallon for gallon Flushmate vessels outperform gravity toilet drain line carry by up to 50% further

Engineered for lasting performance

We've redesigned our 503 and 503H models to be more durable and provide increased flushing performance. Our enhanced design maintains the current size for an easy upgrade of existing Flushmate 503 and 503H systems.

MISO Testing Results for Flushmate 503

MaP scores represent the number of grams of solid waste (soybean paste and toilet paper) that a particular toilet can flush and remove completely from the fixture in a single flush. Chart data provided by internal Flushmate Miso Extraction testing.

Gravity Toilet

Highest MaP Waste Extraction score caps at 1000 grams

503H Series

1.28 gpf system for two-piece toilets

503 Series

1.6 gpf system for one-piece and two-piece toilets
